

This is clean, but it's taking up a lot of space for something that is informational. I know sold is where we enter premium, but do we need that since the tower enters premium directly in the list. And then is it confusing to enter primary in one spot, and excess another. There is also no variance displayed (% is good).

\$ PREMIUM

TECHNICAL
\$48,000

RISK-ADJUSTED
\$52,000

SOLD
52,000

Takes up a lot of space. There is no 12 month tbd. Retro is only taking a date (not what happens in practice). How are different retros being applied to different options? Date feels out of place where it is.

📅 POLICY DATES

EFFECTIVE
01/15/2025

EXPIRATION
01/15/2026

RETRO DATE
01/01/2020

Coverage schedule is missing. Not sure what happened, but there was a version in the original that had a batch edit across options

🛡️ COVERAGE SCHEDULE >

What happens with this space when there are too many cards? What happens when only one card? Could be overloaded at times and completely wasted at others

Looks nice but are more tabs needed, what happens if more options? Does this feature scale?
Looks nice
